DESCRIPTION

This proposed legislation revises a provision pertaining to collaborative practice arrangements between licensed physicians and registered professional nurses. The proposal requires that collaborative practice arrangements allow physicians to delegate to registered professional nurses the authority to order therapies. The registered professional nurse is required to be an advanced practice nurse.

Currently, a registered professional nurse has the authority to administer, dispense, or prescribe drugs and provide treatment if delegated by a licensed physician under a collaborative practice arrangement.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
